Hi Allison, Jayne, and Alan,

Here are the two versions of the pesticides document, 1) tracked changes + comments and 2) clean. Reading through it again, I can see being more streamlined about describing the state's program, but let me know what you think. Allison and Jayne, if you can write in suggested new language and reorganize so it flows better, feel free to do so. After I see your comments, I'm going to take another cut, because I feel like it could be more concise or better organized (it doesn't flow well to me now that I've had some time away from it). Here's the general logic flow:

1998 Action (what we proposed and why)

What state proposed

Description of science behind herbicides, vulnerability of streams, Peter's study, BiOp science, 6217(g) guidance
Studies

Oregon's program

What the State Needs to do

Thanks! After I get your comments, I'll work on it early next week and have something for you to look at on Monday.
